

How to Create a .ZIP File

When submitting your online application, please use the instructions below to create a .zip file with all individual course profile documents:

1. Select all of the files that you wish to combine by holding Ctrl and left-clicking on each of the files so that they are all highlighted
2. Once all files required are highlighted, right-click on one of the files and highlight “send to” and then select “compressed (zipped) folder”

3. A new ZIP file will now be visible. This can be re-named and uploaded to your online application.
